Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: applicants claim a process for preparing 2-cyclopentenones of formula (I) by the conversion of hexenedioic acids and/or their esters of formulae (II) or (III). The closest prior art of record, EP 0297447 teaches such a process, wherein a hexendioic acid or ester thereof is converted in the presence of a solid oxidic catalyst, such as an oxide of magnesium, barium, calcium, zinc, chromium, manganese, molybdenum, etc., with preference given to gamma-aluminum oxide, to a cyclopentenone compound. The closest prior art of record fails to teach or fairly suggest the use of at least one *alkali metal* oxide, on an oxidic support material, as catalyst in such a process, as claimed herein, and as such, the instant claims have been allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
